### ROOF LOADING AND COMPLETION CERTIFICATE

AREA : LE VALLIA

DEVELOPER : CCELGRO PROJECTS

SITE NUMBER : 26278

ENGINEERING SYSTEM : MITEX

DATE : 5 APRIL 2016

REFERENCE NUMBER : 1238

In terms of the National Building Regulations and Building Standards Act we hereby confirm that the proper erection of the structural element as mentioned above took place according to the design of the independent designers drawings supplied to us. We take no responsibility for any of the structural element in the supporting masonry unless issued in an additional certificate from our office. Water Tightness of the roof covering is excluded from this certificate.

The following will have reference:

- The structural element as mentioned above has been built according to the plan and specification for the structure.
- The standard of workmanship and the quality of the materials used for the construction has been done according to building specifications by the developer.
- We have inspected the works and found it in compliance with the specifications and general accepted building practices for structures of this nature.
- We do not take any responsibility for any alterations to the structural element after our inspection date.
